

External Foot Care Resources

This list represents foot care resources that are available in the local area. It is not comprehensive, so there may be other resources that are not listed here. In most cases, service will be provided at the location itself, although some can provide service at the patient's home. If a provider is known to make home visits, it will be indicated below their name. If this is not indicated, please call the provider to see whether in-home service is an option. Fees for service may range from \$35 - \$70 for foot care, so please clarify the fee when you call to book an appointment.
